

Arseny Dremín

Graphics & Systems Programmer

arseny.dremín@proton.me · github.com/RainCatalyst · freezedice.com · Saarbrücken, Germany

SUMMARY

Programmer with 3+ years of professional experience building real-time interactive systems, shipping products to PC, console, and mobile. Strong background in C++, C#, and rendering pipelines — comfortable across gameplay systems, tooling, and graphics. Currently exploring roles in simulation, graphics engineering, and general software development.

WORK EXPERIENCE

Godot Programmer @ NDA (US-based Publisher, Remote) · 2025 – 2026

- Working on an unannounced 3D action-adventure title for a US-based publisher
- Managing a team of 5; responsible for core game systems and asset pipelines

Unity Gameplay Programmer @ Italic Pig (United Kingdom, Remote) · 2022 – 2024

- Shipped [Paleo Pines](#) on PC and console
- Built gameplay systems, automation tools, and custom Unity editor tooling in C#
- Focused on performance optimization and systems architecture across a large codebase

Developer & Co-founder @ Icedrop Games (Remote) · 2020 – Present

- Co-founded an indie studio; shipped [LOK Digital](#) (PC, Mobile, Switch) and [Constellations](#) (PC, Switch)
- Led all technical work: gameplay systems, real-time shaders (GLSL/HLSL), and VFX in Unity and Godot
- Currently releasing [Ultrapool](#) — a roguelike deckbuilder with 15k+ Steam wishlists

Teaching Assistant @ UdS Graphics Lab (Saarland University) · 2024 – 2025

- Designed assignments and contributed to a custom C++ rendering framework for the Computer Graphics course
 - Topics covered: rasterization, ray tracing, physically-based shading, GPU pipeline
-

SELECTED PROJECTS

Zeus Renderer · C++, OpenGL, Mitsuba v3

- Custom offline path-tracing engine with volumetric rendering, Blender scene import, and performance optimizations
- Built on a modified Mitsuba v3 architecture; handles participating media and importance sampling

Arduino Raytracer · C

- Real-time raytracer running on Arduino hardware with custom fixed-point integer math
- Renders to a monochrome display; demonstrates low-level systems and constrained-hardware programming

UmaMusume Skill Optimizer · Python, Streamlit

- Combinatorial optimization tool using a genetic algorithm to solve a multi-constraint deck-building problem
- Deployable as a Streamlit web app or standalone site

Game Jam Portfolio · Unity, Godot, various

- 15+ small-to-mid-scale games shipped across 8 years of game jams; broad range of genres and mechanics
-

TECHNICAL SKILLS

Languages: C++, C#, Python, GDScript, GLSL/HLSL **Engines & Frameworks:** Unity (URP/HDRP), Godot, OpenGL **Tools:** Blender, Houdini, Git **Other:** Genetic algorithms, NLP (spaCy, regex), LLM integrations, Telegram Bot API

EDUCATION

Bachelor's in Computer Science — Saarland University (2023 – 2025)

Vocational Education in Game Development — Futuregames Sweden (2022 – 2023)
